  - Telecommunications – Manufacturing – Transportation – Energy – Finance – Healthcare
- Template Software, a division of EM Business Holdings, Inc., has offices in Arlington, VA and Detroit, MI.

# Template Software Products

## Collaborative Intelligent Information Sharing Software

- **SNAP Intelligent Information Manager (I<sup>2</sup>M)** is a web based application that bridges the gap between enterprise data and the COTS tools used by decision makers
- **Actano's RPlan<sup>®</sup>** is an innovative web-based project management software suite designed to improve collaborative planning, managing and reporting for multiple projects across the enterprise
- **SNAP<sup>®</sup> Integrated Development Environment (IDE)** is a development toolkit that uses inference technology to provide a network centric infrastructure for large, distributed, peer-to-peer mission critical systems

# SNAP<sup>®</sup> Intelligent Information Manager<sup>™</sup> (I<sup>2</sup>M)

*Reduce costs and improve performance by leveraging the untapped intelligence available in your existing enterprise data*

## ■ How does I<sup>2</sup>M Work?

- **Organize** information from a variety of disparate existing sources
- **Analyze** data based on user managed business logic to understand relationships, assess changes for impact analysis, and support key decisions
- **Act** on the data by applying business logic to create work-products, such as schedules or work orders, in targeted applications

# Actano's RPlan® Project Management Suite

- RPlan is Collaborative Project Management
  - Transparency through information, communication and proactive cooperation
  - All project participants are actively integrated into the planning and control process.
    - Enables any time access to up-to-date and uniform planning information
- RPlan provides all the functions required for comprehensive project control:
  - Target-oriented planning and coordination of dates and deadlines
  - Demand for resources from a project
  - Informative reports in line with company-specific requirements
  - Foresighted evaluation of targets and project content
  - Integrated management of risks, issues and derived measures

# SNAP<sup>®</sup> Integrated Development Environment

- The SNAP Integrated Development Environment (IDE) is a development toolkit that uses inference technology to provide a network centric infrastructure for large, distributed, peer-to-peer mission critical systems.
- Key benefits include:
  - Automated predictive modeling and analysis in uncertain conditions with our built-in inference engine
  - Rapid evaluation and integration of real-time events based on pre-defined rules
  - Off the shelf integration with complex enterprise architectures

# Template Software Professional Services

- In addition to comprehensive deployment and implementation services associated with our software products, our staff of professional program managers and technology experts offer a broad range of consulting and custom development services, including:
  - Custom large scale data integration and cleansing in Oracle and SQL Server
  - Knowledge engineering within expert systems
  - Business process engineering and program management consulting
  - Custom Java & .NET development
    - Full scope software life-cycle development
  - Advanced research and development including expert systems and neural networks
